The European Union's planned Article 47 of the Common Fisheries Policy demands that **ALL** recreational sea anglers register their catch so it can be included in the UK's national fishing quota.

Sea anglers who catch fish from the shore, pier, boat or

any other vessel would have to declare their catch or risk a **£50,000** fine.

This **CANNOT** be allowed to happen. It would destroy recreational sea angling in Britain **FOREVER**.

Put your name to the **UKIP petition** to scrap Article 47 now!
